## Allen Walk-Behind Trowel Pro436e 46"

Perfect for troweling along the edges of walls or around extrusions, the Pro436 Edger features all the power and performance of our Pro Series with the patented advantage that allows it to outperform other edging walkers. Guard rings rotate, allowing for a ride along the edge.

## Allen 36" Walk Behind Trowel PRO436

Brand new to the Allen Pro-Series of walkers is the Pro436TC. The Pro436TC is equipped with a variable-speed torque converter clutch in place of the standard weighted centrifugal clutch. The Pro436TC is the fastest 36" walk-behind trowel, which provides contractors with a much wider range of rotor speeds and torque.

## Husqvarna Ct 36 Walk Behind Trowel, 36" 8 Hp

Patented dynamically balanced trowels (when blades are turning) gives you the same performance at all speeds with all types of blades including float pans. Perfect results in all edging areas. Gyroscopic safety sensor and engine speed limiter provide operator protection by stopping handle rotation within three-quarters turn.

## Multiquip 36" Walk Behind Trowel

Front access panel provides quick access to trowel arms and blades. Center mount lifting bale included. Spider and thrust collar assembly design simplifies routine maintenance. Gearbox features top quality components & large oil capacity for years of trouble-free performance. Optimally balanced for smooth finishing

## Wacker Neuson Self Priming Trash Pumps PT3

PT pumps are ideal for general dewatering of excavations, flooded basements, manholes, utility vaults, mining work, swimming pools, lakes and barge holds or wherever there is unwanted water. With built-in contractor friendly features, this line of trash pumps has redefined the quality and durability standards of self-priming, centrifugal trash pumps.

*all it takes!*

## Minnich Stinger

The Stinger electric flex shaft concrete vibrator is lightweight, durable and versatile. The Stinger is a 15 amp (115-volt) universal motor that drives a full line of Minnich shafts and heads. The unit comes standard with a quick disconnect. Optional quick disconnects that adapt to the shafts and heads of other manufacturers are available. The Stinger offers a more compatible speed range for today's placement challenges. The Minnich vibrator system design runs at a lower amp range and the durable frame extends vibrator life. The lightweight motor and frame-handle positions offer many ergonomic user features.
