

## RENTAL GUIDE

**YOU'VE GOT A JOB TO GET DONE.  
WE'RE HERE TO HELP.**

*The team here at McCann believes you deserve a trusted supplier who cares about your long-term success as much as the success of the project at hand.*

*We will be courteous and knowledgeable in our interactions with you and your team. Our equipment will be dependable, clean and well-maintained. When something goes down, we will jump on it with the urgency you expect. We will communicate with you along the way. If you have an interest in owning the equipment, we will work with you to find a solution. We are also here to help with the construction materials and tools you need day to day.*

*If you already do business with us... Thank you.  
If not, we would like an opportunity to earn your business.*

*Here to help,*

A handwritten signature in black ink, appearing to read 'Jim McCann', with a long horizontal stroke extending to the right.

**Jim McCann  
CEO, McCann Industries**

# Technology Center for Machine Tracking and Preventive Maintenance

Telematics provide you with information on machine location, performance, overall health, service needs, and more. At McCann, our telematics specialist will help you understand the data that is available through your machines' telematics systems, so you can maximize productivity on all your equipment.

## CASE SiteWatch

CASE SiteWatch automatically collects equipment data and wirelessly transmits it, so you can track the machine's location, monitor the hours of operation, and capture machine usage data, like idle time. McCann Industries can take care of your maintenance needs automatically through notifications from your SiteWatch system. We can even troubleshoot problems remotely, so we arrive at your jobsite with the parts and diagnostic equipment needed to repair your equipment, reducing your downtime.

## Takeuchi Fleet Management (TFM)

TFM lets you monitor the health of the machine and minimize costly repair calls with real-time information. It includes remote diagnostics that capture operating hours and equipment data that can be used to schedule maintenance based on actual machine hours. TFM provides valuable information that McCann can access, so if there is a problem, our technician can arrive at the site with the correct tools and parts, minimizing downtime.

## KOBELCO Monitoring Excavation System (KOMEXS)

KOMEXS is a web-based program that lets owners monitor their entire fleet remotely. Keep track of fuel consumption, hours of work, machine load, digging hours, idle time, break times, schedule maintenance, and fault codes. The online machine monitoring reports are accessible from anywhere for both you and McCann. Using KOMEXS, we can help you proactively plan machine maintenance to minimize downtime.

# CONCRETE & MASONRY EQUIPMENT

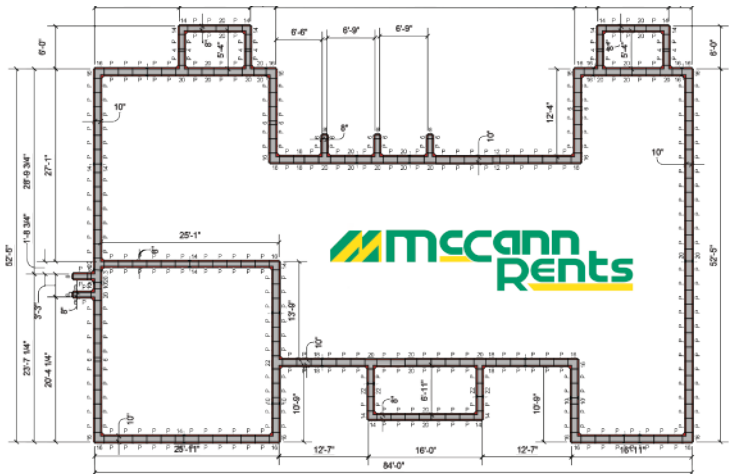

# McCann rents Symons Steel Ply Forms

Steel-Ply is the most widely accepted, pre-engineered, modular formwork system in use today. It is designed for maximum versatility and can be used to form virtually any concrete structure.

- Clean, well maintained forming panels, fillers and accessories
- 1000 psf allowable pressure
- Designed to form both straight and radius walls
- System may be handset or assembled into gangs
- Most popular concrete forming system in the USA
- Layout & Estimating available

## Rental Guidelines

- A McCann Industries Rental Agreement must be signed, and an account must be established prior to pick up or delivery.
- Rates are based on the length of the rental period, with an 8 hour day, 40 hour week, and 160 hour 4-week period. Additional hours will be billed at overtime rates. Rates and equipment are subject to change without notice. Local and state taxes may apply.
- Rental machines must be returned with a full tank of fuel, or additional fuel charges will apply.
- Lessee is responsible for daily maintenance, excessive or unusual wear and tear, and any tire or track repairs.
- Physical damage and liability insurance is required from the lessee for the equipment to protect against damage, theft or vandalism. A certificate of insurance is required prior to rental.
- Lessee will return equipment in a reasonably clean condition. Lessee will be billed for excessive clean up at posted shop rates.
- Delivery is additional to the rental rate and is quoted FOB McCann Industries. State and local permit costs are additional when required.

Compiling and verifying a comprehensive rental guide is a complex task, involving a vast number of product numbers, dimensions, and other details including pricing. Achieving absolute perfection in this process is not commercially feasible. Although we have made every effort to include the most up-to-date lists, dimensions, descriptions, designs and pricing in this guide, we cannot guarantee their accuracy. If any errors or misprints have eluded our checkers and printers, we cannot be held responsible for them, but we will strive to correct them.

All the information presented in this guide regarding the specification's equipment, tools, or machines is derived from the manufacturers' compiled data, provided for the convenience of the buyer. We do not assume responsibility for the accuracy of this information. Our rental fleet is constantly evolving, and therefore, designs, specifications, accessories and pricing are subject to change without prior notice.

Please note that images included in this guide may be modified. All references made in this guide are solely for descriptive purposes and should not be considered as representations of any kind.
